***The following provides a summary of CRC activities in the month of October dedicated to the achievement of goals 1,2, & 5. While there is much happening in all Goal areas, these highlight the ways in which we've focused our energy at this time to benefit and best respond to regional needs.***

## **Goal 1:**

In consultation with our Zone 5 Leadership Think Tank, the CRC is working to support regional implementation of Ministerial Order on Student Learning #28/2020. Recently we launched a project open to all Zone 5 schools, [Introducing the Ministerial Order on Student Learning](#). Administrators were provided with a 2-part learning experience to complete with their staff that employs Visible Thinking routines to open conversation, gather impressions, and identify learning needs for staff. In addition to serving the purpose of staff learning, the CRC will use these opportunities to collect data directly from schools related to current staff understandings and future learning needs. The data will be shared back with individual school authorities and Education authorities who choose to participate, as well as provide the Zone with an overall profile for the region. This will in turn support future directions for our Zone 5 Leadership Think Tank as we collaborate to prepare for the implementation of future curriculum.

## **Goal 2:**

This month the [Top 10 Teacher Techniques to Support Middle School / Junior High Readers](#) resource was delivered *directly* to the inboxes of system leaders. Created in response to on-going collaboration and needs consultation with our Literacy Think Tank, we partnered with science of reading expert Charlotte Kirchner to create this valuable and needed resource. System leaders were encouraged to share it widely and it was also included in our monthly eNews as well as shared via Twitter and Facebook.

We continue to work with Miram Ramzy and Michelle Bence, researchers from the University of Calgary, to meet provincial demand for their 6 part learning series [Layers of Reading Development: Moving Research into Best Practice](#). The original series, which opened in January, filled to capacity with 490 participants. Working with the researchers we've been able to offer a repeat of the series beginning later in the spring, with this round being open to 600 provincial participants.

There will be French Immersion, FSL, and administrator cohorts. As a result of this learning series, these leaders will have the opportunity to engage 32 teachers and administrators from across the Zone 5 region in exploring a problem of practice. The CRC is leading the design of the learning, and supporting these leaders in running the groups.
